Vineyard

Soil : Clay and limestone.

blend : Merlot 85%. Cabernet Franc 15%.

surface area: 9 hectares (22.24 acres).

Production : 230 HL.

Average age of vines : 65% <35 years old> 35%

Density of planting : 5500 vines/ha.

Culture / Itinéraire technique

Mechanical work : intercep under the vines (0% glyphosate), mow inter-row, topping.

Manual work: Pruning, removed unwanted new shoots, debudding. Manual work is favored for their precision, respect for the plant and to limit our carbon footprint.

Spray treatment: based on bio-control product (35%), phytopharmaceutical products (non-CMR) and optimized use according to climatic and phenological conditions and ungraded natural manure.

Vine growing / Aging

Harvest : Machine-made and manuals for the oldest vines.

Vinification : Bioprotection" winemaking without sul-fites during the vinification. Concrete and stainless-steel tanks with temperature-controlled system.

Aging : 12 months in barrels (French oak, 4 coopers), with 50 % new barrels every year.

Bottling : At the property.
